urban edge

UDIA Urban Development Institute of Australia QUEENSLAND

Affordable, Sustainable & Innovative Designs

How do we design and develop homes and lifestyles for future Australians?

With an increase demand for affordable homes that deliver sustainability, there is ever increasing pressure on the industry to provide innovative solutions. The Smarter Small home is one such solution, built using affordable material it has become one of the first affordable homes with a focus on sustainability.

At this, the first Urban Edge event for 2010, Kevin Doodney, award winning Principal for LJ Hooker Land Marketing, will share with you the journey of the Smarter Small House, from its conception to design to product selection to the completion and finally to sale. Kevin is also currently working on a new project incorporating the use of concrete and will also exclusively share with you the journey of making this home a success.

This event will supply you with the knowledge of how to use sustainable and innovative designs to create a project that is stylish and **very** affordable in today's market.
